Manitoba Government
Libraries Council

December 1986

The Manitoba Government Libraries Council is pleased to send you a copy of a Directory of Libraries and Resource Centres in the Government of Manitoba.

The Council was officially created in July 1985 by an Order In Council for the purpose of fostering the exchange of information and cooperation among members of the Council. It is composed of representatives from departmental, agency and crown corporation libraries of the provincial government. The MGLC is responsible to Executive Council.

Libraries within the Manitoba Government are important as information centres for both staff and the general public. The information explosion of the past two decades has accentuated the need for personnel with the special knowledge and skill required to organize and retrieve relevant and timely information for government staff. Those skilled personnel are the librarians and library technicians working in Manitoba government libraries.

We recognize that you have an information network that consists of colleagues, professionals, organizations and publications. Libraries in government, particularly with their access to computer data bases across the continent, are also part of that network.

We hope that this directory serves to expand your information network.

INTRODUCTION

The Directory of Libraries and Resource Centres in the Government of Manitoba is intended to provide the user with easy access to information about collections and services in libraries within government.

Entries are arranged alphabetically by department. A department's main library is listed first followed by agency libraries falling under the jurisdiction of the department. Crown Corporation libraries are listed in alphabetical order following the departments.

Manitoba Government Libraries Council is grateful to all those libraries who contributed information for inclusion in this publication. The Council intends to issue a revised edition within eighteen months.

Any errors, ommissions and suggestions should be directed to:
